I appreciate your assistance and the hard work of your staff. My concern is that these are abortion clinics who are performing invasive surgery requiring a sterile technique. They are not just individual medical practices. Some of these practices are performing second trimester abortions up to 19 weeks gestation! With no oversight and accountability, these practices are left to police themselves.

A to Z Women's Center in Las Vegas:

<https://www.drmoslasvegas.com/abortion-services/second-trimester-abortion/>

SECOND TRIMESTER ABORTION

We perform Second Trimester Abortions on patients who are between 12 and 18.6 weeks pregnant in one office visit.

If you are 12 or more weeks pregnant, and are having a second trimester abortion, our staff at A-Z Women's Center will provide you with all the support you will need. You can feel comfortable and safe knowing that your abortion will be performed in a hospital-like setting by a highly experienced specialist in Ob/Gyn and abortion care.

- Length of pregnancy is accurately determined by **ultrasound** in our office before a 2nd trimester abortion is performed.
- Patients less than 18.6 weeks pregnant are **done in one day**.
- Second trimester abortion patients will receive **intravenous medication** for anxiety and pain control. You **MUST have an adult to assist you** in safely returning home. You will not be able to drive or work for 24 hours after the intravenous medication.

Nitrous oxide (*laughing gas*) is available for additional relaxation and pain relief.

A-Z Women's Center is **uniquely qualified to manage genetics and fetal abnormality cases**.

Often, these women have a desired and planned pregnancy. However, thru various laboratory and ultrasound testing, a severe abnormality in the fetus is discovered or the woman is found to have a medical condition that makes the pregnancy unusually hazardous.

Note: Our fees for genetic abnormality and maternal medical indications is determined on a case-by-case basis.

- Vaginal Plastic Surgery
- Botox and Facial Fillers
- Cosmetic Labiaectomy.

Planned Parenthood - Las Vegas

<https://www.plannedparenthood.org/health-center?location=Las+Vegas%2C+NV%2C+USA>

Planned Parenthood - East Flamingo Las Vegas

<https://www.plannedparenthood.org/health-center/nevada/las-vegas/89121/las-vegas-east-flamingo-2306-90210/abortion>

And for these Planned Parenthood clinics who only perform medication abortion, one of your state's own physician practices (**West End Women's Medical Group - Reno**) who performs surgical abortions but **refuses to prescribe RU 486** highlights why on their website: http://www.abortion.cc/pag_abpill.html I hope that your state will give careful consideration to devastation that no oversight can have on women in Nevada.

Subject: FW: Public Records Request

Staff found All Women Care on Sahara and their SOD/POC info going back to 2011 is at findahealthfacility.nv.gov. This is an outpatient facility.

Staff looked for the rest of them and they're not in our database, so we don't license them. We don't license individual medical practices.

Birth Control Care Center is new, initial survey was conducted December 6, 2017, so there won't be older info.

Safe and Sound got their first license on Sept. 4, 2014, so staff will see if they have anything for 2015, 2016 or 2017.
