A 000	Continued From page 3 understandable to a layperson, a simultaneous verbal explanation of the heart auscultation; Based on a review of documentation, personnel records and an interview with staff, patients did not receive a sonogram performed by a sonographer certified by a national registry of medical sonographers. Findings were: In a review of 18 clinical records, 14 of the 18 patients (patients #7 - #8, #8 and #10 - #18) received their sonogram from a sonographer who was not certified by a national registry of medical sonographers. The personnel record for staff #8 contained no evidence of certification, and staff #8 confirmed verbally that staff #8 was not certified by a national registry of medical sonographers.	A 000			
A 197	TAC 139.48(1)(A) Physical & Environmental Requirements The physical and environmental requirements for a licensed abortion facility are as follows. (1) A facility shall: (A) have a safe and sanitary environment, properly constructed, equipped, and maintained to protect the health and safety of patients and staff at all times; This Requirement is not met as evidenced by: Based on observation and an interview with staff, the facility failed to have a safe and sanitary environment that was maintained to protect the health and safety of patients and staff at all times.	A 197	A 197 The Clinic Administrator will be responsible for maintaining a safe and sanitary environment to protect the health and safety of patients and staff. The exam table in the small procedure room will be replaced by November 15, 2015. The exam table in the large procedure room will be replaced by November 15, 2015.	11/15/15 11/15/15

A 197	Continued From page 4. Findings were: During a tour of the facility on 10-6-18, the following observations were made: - The vinyl cover on the exam table in the small procedure room contained rips and tears, which can harbor bacteria and prevent the exam table from being completely cleaned. - The vinyl cover on the exam table in the large procedure room contained cracks along the edge, which can harbor bacteria and prevent the item from being completely cleaned. - Examination of the medications in the emergency cart revealed 2 of 4 500 milliliter bags of intravenous solution of 6% dextrose and 0.9% normal saline that had expired at the end of 8-18 but were still available for patient use. The above was confirmed in an interview with staff #8 during a tour of the facility on 10-6-18.	A 197	In order to ensure a safe and sanitary environment, the Clinic Administrator will inspect all clinic equipment as part of monthly physical plant walk through. All deteriorated equipment will be evaluated for possible repair or overall replacement. A complete review of the crash cart was completed by the Clinic Administrator on October 27, 2018. All medications and equipment due to expire in October 2018 have been replaced. The Director of Clinical Services will hold a mandatory staff in-service for all clinic personnel on November 6th. In order to review the Crash Cart policy, this training will include a competency element to ensure the staff's understanding. The Clinic Administrator will ensure a crash cart audit is performed on a weekly basis by the clinical coordinator. The clinic administrator will conduct a random inspection on a monthly basis in order to ensure compliance.	10/07/18 11/06/18
A 201	TAC 199.48(1)(E)(F) Physical & Environmental Requirements: The physical and environmental requirements for a licensed abortion facility are as follows: (1) A facility shall: (E) store hazardous cleaning solutions and compounds in a secure manner and label substances; (F) have the capacity to provide patients with liquids. The facility may provide commercially packaged food to patients in individual servings. If other food is provided by the facility, it shall be subject to the requirements of §5222.161 -	A 201	A 201 The Clinic Administrator will be responsible for ensuring all physical and environmental requirements are strictly followed. All cleaning solutions and compounds have been stored in a secure manner.

A 201	Continued From page 5 229.171 of this title (relating to Texas Food Establishments): This Requirement is not met as evidenced by: Based on a tour of the facility, the facility failed to store hazardous cleaning solutions and compounds in a secure manner. Failure to do so increases the risk of harm to patients. Findings were: During a tour of the facility on 10-8-18, the unlocked laundry room contained items including disinfectant spray, air freshener spray, germicidal wipes, plant feeder sprays, all-purpose spray cleaner and bleach. The above was confirmed in an interview with staff #9 on 10-8-18 during a tour of the facility.	A 201	A door knob with a lock and key mechanism will be installed on the laundry room door by November 8, 2018. The Clinic Administrator will ensure the key is kept in a secure location available only to staff. The door will remain locked while patients are in the building. The Clinic Administrator will facilitate an in-service on November 8, 2018 to train staff on how to handle and store cleaning supplies in accordance to TAG 159.46 (1)(E)(F). The Clinic Administrator will monitor compliance with this procedure by confirming the cleaning supplies storage room is secured at the end of the day.	11/08/18 11/08/18
A 244	TAG 159.49(d)(5)(F)(i)(ii) Infection Control Standards (F) Biological Indicators. (i) The efficacy of the sterilizing process shall be monitored with reliable biological indicators appropriate for the type of sterilizer used (e.g., <i>Bacillus stearothermophilus</i> for steam sterilizers). (ii) Biological indicators shall be included in at least one run each day of use for steam sterilizers. This Requirement is not met as evidenced by: Based on a review of facility provided documentation and interview, it was determined the facility failed to ensure that log for biological indicators was maintained with the load	A 244	A 244 The Clinic Administrator will be responsible for ensuring all infection control standards are properly followed.

A244	Continued From page 7. 10/05/18) contained documentation of the load identification number, the contents of the load per facility based procedure. This log has an area to indicate "Bio indicator in load", there was no documentation of the biological indicator results on this form. The Biological Indicator Log did not contain the results of the biological indicator tests for the 2 autoclaves used at the facility. The area to document the results for the two sterilizers (1 and 2) contained initials and the date and start time of the incubation for each Autoclave for the 24 hour and 48 hour check, but the positive or negative results for the tests were not documented. The only results indicated were for the control. The area to document the control from 04/07/18 through 10/05/18 would indicate for the 24 hour check "no growth" and for the 48 hour reading "growth". In an interview on 10/05/18, staff member # 10 confirmed that the results of the biological indicators were not appropriately documented in the facility logs to indicate positive or negative results.	A244	Pathology personnel confirmed that a clerical error was made on the Biological Indicator log form 04/07/18 thru 10/05/18. The control results were recorded in the area dedicated for the 48 hour check. Clerical errors in Biological Indicator log will be correct by November 30, 2018. On November 11th, The Director of Clinical Services will facilitate an in-service with the Clinic leadership and all staff who work in the decontamination and sterilization practices of the clinic in order to review our protocols for decontamination and sterilization and retrain the staff on this practice and documentation. In order to monitor compliance the Clinic Administrator will review the Biological Indicator Log on a weekly basis.	11/30/18 11/11/18
